Internship

Presentation of Website

10/03/2023

# Introduciion

This is Dipesh Goswami !!!

## Website Presentation

Dear, Respected Ma'am Meghna Panara.....

I have created website on Sports, where i have used Html/CSS, BOOTSTRAP, JavaScript, JQuery etc.....

In this website i have made nearly 5 web pages and the main page is declared as FUTURE SPORTS!!!!!!

# About 1st page

## FUTURE SPORTS!!!!!!

In the very First page i have done some navigation bar, parallax effect, couple of sticky bars, and i have put hover effect in highlighted sports like Hockey, Badminton, WeightLifting etc....

At the end i have made simple Footer for making my Website more attractive.....

# Linked Pages

1. For reaching at other pages i have put anchor tag on every hover effect shown in FUTURE SPORTS!!!!

or

I have used navigation tag for creating button on which we can click and we can move to another web page of this website!!!!

# Hockey

In this webpage i have put slider using j query.....

i have done parallax effect, put footer and navigation bar  
tooo.....

# Badminton

This is second linked page of my website .....

And i have done same parralax effect, navigation bar and footer as my website's main page FUTURE SPORTS!!!!!! and Hockey.....

# Weightlifting

This is last web page of my website related to my content.....

In this web page i have done parallax, nav bar, footer same as my other linked webpages related to my content.....

# Coniaci Us

This is last linked and last web page of my website too!!!!

In this webpage i have used BootStrap....  
And added some extra elements like navigation bar!!!

# Termination

So this was everything about my  
web page  
and i have done it by very  
perfectly but if there is any kind of  
problem have been occurred  
from which i am not aware so  
please let me solve it.....

Thank you !!!!!
